Professional Experience

Harlem Children's Zone

Jan 2026 – Present

Data Analyst

- Architected high-volume financial data pipelines utilizing Node.js and Azure Data Fabric, cutting event processing latency by 40% while improving cross-functional team collaborations.
- Designed scalable frontend frameworks utilizing React and Next.js, elevating overall UI performance metrics by 35% and enabling real-time dashboard analytics for senior stakeholders.
- Mentored multiple junior engineering teams actively, elevating technical standards and boosting throughput by 30%.
- Formulated highly reliable asynchronous workflows utilizing BullMQ, enabling stable 100% mission-critical uptime.
- Executed highly advanced NoSQL database queries seamlessly, driving a solid 25% increase in retrieval speeds.

Capital One

Jul 2025 – Jan 2026

Software Engineer

- Engineered high-performance backend microservices using Node.js and NestJS infrastructures, scaling distributed financial platforms to support over 2M complex client transactions daily.
- Orchestrated highly resilient event-driven CI/CD pipelines deploying Azure App Services natively, dropping deployment times by 50% while managing system complexities across Azure ecosystems.
- Constructed highly robust server-side rendering components and state management patterns expertly, cutting frontend latency by 40% and delivering production-grade software to end consumers.
- Integrated scalable REST APIs utilizing modern component-driven designs, boosting application throughput by 35%.
- Resolved production incidents gracefully under pressure, sustaining 99% overall reliability for trading systems.

Public Service Enterprise Group (PSE&G)

May 2024 - Aug 2024

Information Technology Intern

- Fortified mission-critical cloud infrastructure running complex Linux environments securely, remediating 95% of system anomalies and troubleshooting Azure service faults with high precision.
- Analyzed complex large-scale messaging queue architecture frameworks to support technical teams perfectly, cutting deployment risks by 40% while translating business needs into clean outcomes.
- Advanced distributed system workflows utilizing TypeORM and highly complex SQL queries smoothly, rigorously validating massive datasets to ensure 100% event integrity across SQL platforms.

Epsilon

Apr 2020 – May 2023

Software Engineer

- Spearheaded the complete software development lifecycle for scalable real-time trading engines, improving platform performance by 25% and reducing asynchronous latency securely by 30%.
- Partnered with key cross-functional stakeholders to deliver 10+ robust distributed solutions on schedule, aligning tightly with core architectural decisions and major enterprise objectives.
- Streamlined modern event-driven infrastructure pipelines, cutting manual service configuration tasks easily by 40%.
- Optimized complex Kafka streaming data processes securely, yielding 20% faster query execution and message flows.

Technical Skills

Programming Languages: TypeScript, JavaScript, Node.js, SQL, HTML5, CSS3

Frontend Development: React, Next.js, TailwindCSS, Server-Side Rendering, Component-Driven Design

Backend Development: NestJS, REST APIs, Microservices, BullMQ, TypeORM, Asynchronous Workflows

Databases & Storage: SQL, NoSQL, Azure Data Fabric, High-Performance Data Processing

Cloud & DevOps: Microsoft Azure, Docker, CI/CD, Infrastructure-as-Code, Linux, Azure App Services

Testing & Tools: Kafka, Azure Service Bus, Azure Event Grid, Event-Driven Architecture, Distributed Systems

Projects

Okada Leasing AI (Okada & Co. Hackathon Winner, New York, NY) - MongoDB

Sep 2025

- Engineered a FastAPI RAG chatbot using LlamaIndex, accelerating property scheduling and searches by 40%.

High-Volume Event Trading System - Node.js, Kafka, NestJS, Azure

Apr 2025

- Architected a fast Node.js and Kafka event-driven system, enabling 30% faster data processing on Azure Service Bus.

Education

New Jersey Institute of Technology

Newark, NJ

Masters of Science in Computer Science

Sep 2023 - May 2025

University of Mumbai

Mumbai, India

Bachelors of Science in Computer Science

Aug 2016 - May 2020
